To whom it may concern,

I currently use the WaterSavr Evaporation Control Product in our irrigation ponds at La Quinta CC in La Quinta, CA. The product is very easy to apply and does not affect the aesthetics of our waterfeatures after it completely spreads over the surface of our lakes.

In Southern California, water conservation is an important issue and at La Quinta CC we are very interested in environmental stewardship. I would recommend WaterSavr Evaporation Control Product to any other Superintendent interested in adopting cost-effective, water conservation methods.

Sincerely,

A handwritten signature in black ink that reads "Tim D. Putnam". The signature is written in a cursive style with a long horizontal flourish at the end.

Tim Putnam
